Part 2

Bootstrap

Cons

- Sometimes overriding built-in responsive styles can be difficult and might require external tools for compilation.

Pros

 - Does not required good knowledge of CSS

 - There premade components of bootstrap that are already build for mobile first

 - Bootstrap includes pre-defined media queries that makes it easier to build responsive interface

Media Queries

Cons

 - Requires knowledge of good CSS

 - Writing media queries is time consuming, it requires you to write a lot of code.

 - You have to take care of testing your media queries extensively with different browsers and devices.

Pros

 - Writing media queries helps improve your CSS skill.

 - You get the power of creating exactly what you need.
